

# Lesson01\_Setup

July 14, 2019

## 1 Setup

1. Go to <https://github.com/GWC-DCMB/SummerExperience>
2. Click the green “Clone or download” button, then click “Download ZIP”.
3. In the bottom left, click the file to unzip it.
4. Go to <https://drive.google.com> and log in to your Google account.
5. In the upper left, press “New”.
6. Click “folder upload” and select the folder SummerExperience-master.
7. Double-click the folder SummerExperience-master to open it.
8. Double-click the Lessons folder.
9. Double-click the notebook Lesson02\_HelloWorld\_Variables.ipynb.
10. Click “Colaboratory” to open the notebook with Google Colab.
11. When Colab loads, you should see something like this:

Congrats, you’re ready to start coding!
